CYWARENESS™

ARE YOU READY FOR THE NEXT ATTACK?

CYWARENESS™

YOUR EMPLOYEES:
YOUR GREATEST ASSET IS YOUR WEAKEST LINK

90%
of data breaches are caused by human error

88%
of organizations reported phishing attacks

41%
of employees accidentally leaked data

From threat to defender

Cywareness is an autonomous simulator that provides the employee with ongoing training that educates them with the knowledge and skillset to face today's cyber threats.

Cywareness allows you to maximize your employees' cybersecurity potential by exposing them to cybercrime scenarios on an ongoing basis, with no additional requirements or resources from your IT team.

CORE FEATURES

Autonomous:
From auditing to ongoing training, the simulator is fully autonomous, allowing your team to sit back and watch your organizational cyber awareness increase.

Personalization:
Every employee is different, the simulator creates a personal dynamic training program for each employee that changes based on employee performance.

Localization:
When in Rome, attack as the Romans do. The simulator attacks each user based on their local attributes such as timezone, language and local brands.

Complexity:
There is no black or white in cybersecurity training our attacks are designed to understand precisely what are the weaknesses and strengths of each employee from late at night emails, to system notifications.
